

SEALPAC® A5

measures in mm

TECHNICAL INFORMATION

Output:	up to 70 trays/minute ¹⁾
Capacity:	up to maximum 15 cycles/minute ²⁾
Machine weight:	1,600 kg
Air pressure:	min. 6 bar
Connection values:	3 x 400/230V+N+E – max. 8 kW ³⁾

¹⁾ Machine outputs quoted refer to packaging mode vacuum/gas for food.

Outputs are generally higher for sealing applications only.

²⁾ Capacity may vary according to tray format and other process data.

³⁾ Connection values vary according to equipment and operation specification.

BG/GS safety tested and certified. All rights reserved for technical modifications.

For excellent service wherever you are.
Your SEALPAC partner:

SEALPAC – your package to success.

As a high-precision manufacturer, we support our customers in reaching their targets. We work together to create cost-effective and guaranteed high-quality solutions. Our flexible and dedicated approach will guide you in exploring individual alternatives to help shape your future.

THE COMPACT CLASS SEALPAC® A5 FULLY AUTOMATED TRAY-SEALING UNIT

All-in-one complete.
Saves space and costs.

THE COMPACT CLASS SEALPAC® A5

FULLY AUTOMATED TRAY-SEALING UNIT

The **SEALPAC A5** stands for flexibility and high-level adaptability to individual applications.

SEALPAC-packaging systems operate successfully worldwide. As a high-precision manufacturer, we share our expertise with your production. Our full product range is based on the quality standard "Made in Germany". Our support is customised to meet all your needs for a specific tray-sealing system. Our solutions are tailored to your production and profitability – that means for example lower maintenance costs.

In brief: state-of-art technology from an experienced manufacturer.

The **SEALPAC A5** has so much to offer: compact design and total performance. We bring you the professional approach crucial in industrial processing.

Fully automated, this unit combines all the benefits of the larger models with its compact and space-saving format. Up to 70 packs per minute are attainable with MAP*, depending on tray type and application.

The ideal entry-level model for high-tech packaging of all types of fresh products.

Checkweighing option before sealing process

Customised product accessories for easy integration

Digital film transport system via Servo technology

Maximum product security via adjustable sealing pressure

Swivel-mounted terminal for ergonomic and left/right-hand machine operation

Touchscreen panel with 50 programmes and packaging settings for easy use

Transparent protective cover for secure production monitoring

Tool compartment, easy access from both sides

Compact and systematically designed switchboard

APPLICATIONS

Fresh food requires fast and reliable processing performance. The **SEALPAC A5** can process all types of sealable materials and is especially suited to product manufacturers at entry-level, such as producers of fresh meat and poultry, deep-frozen and a large range of convenience foods.

SEALPAC is the optimal packaging solution for your product.

SEALPAC MAP+ SYSTEM

Faster, fresher packaging, with more appeal!

SEALPAC's exclusively developed vacuum and gas injection system for packing fresh food products via MAP* technology.

Use the benefits:

- Reduced product exposure
- Shorter cycle times
- Optimized gas figures
- Reduced gas consumption

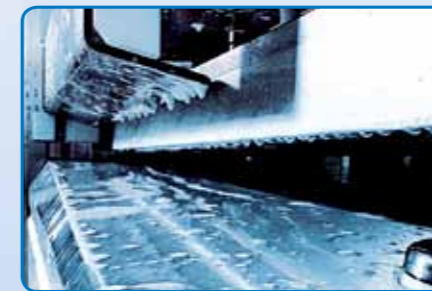

Absolutely clean and secure. Excellent operation guaranteed.

SIMPLE Operation:

Superior design guarantees perfection down to the very last detail. Ergonomic factors for easy handling are crucial process factors.

- Handling via touchscreen
- Left/right-hand operation
- Rapid tool exchange system with fully integrated connections
- Pneumatically adjustable stoppers

CLEAN Hygiene:

Food industry requires top hygiene standards for best quality. **SEALPAC** maintains this quality every time via the sustained perfection of our machines.

- Wash-down stainless steel frames
- Protection standard up to IP 65
- Self-draining hygienic construction
- Complete sanitation without niches

SECURE Technology:

Our mission is state-of-the-art technology and manufacturing experience: **SEALPAC tray-sealing machines** are inspirational and give eye catching innovations to the packaging market.

- Secure guidance for trays in all sequential stages
- Trouble-free integration in existing production lines
- Interface for external communication
- High sealing power
- Proven SEALPAC InsideCut system
