

SEALPAC® A4

Measures in mm

TECHNICAL INFORMATION

Output:	up to 30 trays/minute ¹⁾
Capacity:	up to maximum 15 cycles/minute ²⁾
Machine weight:	1.400 kg
Air pressure:	min. 6 bar
Connection values:	3 x 400/230V+N+E – max. 8 kW ³⁾

¹⁾ Machine outputs quoted refer to packaging mode vacuum/gas for food.

Outputs are generally higher for sealing applications only.

²⁾ Capacity may vary according to tray format and other process data.

³⁾ Connection values vary according to equipment and operation specification.

BG/GS safety tested and certified. All rights reserved for technical modifications.

THE PRIME CLASS SEALPAC® A4 FULLY AUTOMATED TRAY-SEALING UNIT

Smallest footprint.
Highest performance.

SEALPAC®

Forming Innovations

THE PRIME CLASS SEALPAC® A4

FULLY AUTOMATED TRAY-SEALING UNIT

The **SEALPAC A4** stands for unlimited versatility.
Use it to boost your yields and productivity.

SEALPAC-packaging systems operate successfully worldwide. As a high-precision manufacturer, we share our expertise with your production. Our full product range is based on the quality standard "Made in Germany". Our support is customised to meet all your needs for a specific tray-sealing system. Our solutions are tailored to your production and profitability – that means for example lower maintenance costs.

In brief: state-of-art technology from an experienced manufacturer.

The **SEALPAC A4** stands out because of its versatility and flexibility in the packaging of fresh products. With its compact and solid design, this machine is compatible with a vast amount of tray dimensions as well as all common packaging solutions like cold and hot filling, MAP* or TraySkin®.

With up to 30 packs per minute depending on the type of tray and application with MAP*, the **SEALPAC A4** is the perfect tray-sealer for fresh products with varying production runs. Furthermore, its unique tooling quick exchange system simplifies your production processes.

The prime class shines with flexibility
whilst its all-round use optimises your
production.

Digital film transport system
via Servo technology

Innovative tip-up protection
covers allow for ergonomic
cleaning and maintenance

Swivel-mounted terminal for
ergonomic and left/right-hand
machine operation

Tool compartment, easy
access from both sides

Compact and system-
atically designed
switchboard

APPLICATIONS

Fresh food requires fast and reliable processing performance. The **SEALPAC A4** processes all sealable materials and is highly suitable for solutions in continually growing and dynamic markets, such as fresh meat, fresh poultry, cheese and processed meat, but specifically for wide ranges of (deep-frozen) convenience foods.

SEALPAC is the optimal packaging solution for your product.

SEALPAC MAP+ SYSTEM

Faster, fresher packaging,
with more appeal!

SEALPAC's exclusively developed vacuum and gas injection system for packing fresh food products via MAP* technology.

Use the benefits:

- Reduced product exposure
- Shorter cycle times
- Optimized gas figures
- Reduced gas consumption

* Modified Atmosphere Packaging

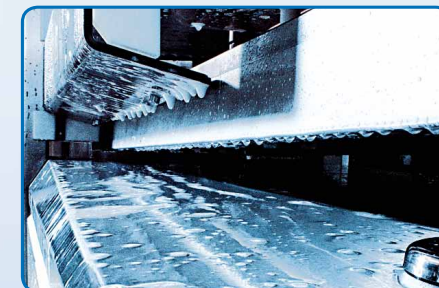

Absolutely clean and secure. Excellent operation guaranteed.

SIMPLE Operation:

Superior design guarantees perfection down to the very last detail. Ergonomic factors for easy handling are crucial process factors.

- Handling via touchscreen
- Left/right-hand operation
- Rapid tool exchange system with fully integrated connections
- Pneumatically adjustable stoppers

CLEAN Hygiene:

Food industry requires top hygiene standards for best quality. **SEALPAC** maintains this quality every time via the sustained perfection of our machines.

- Wash-down stainless steel frames
- Protection standard up to IP 65
- Self-draining hygienic construction
- Complete sanitation without niches
- Tip-up protection covers

SECURE Technology:

Our mission is state-of-the-art technology and manufacturing experience: **SEALPAC tray-sealing units** are inspirational and give eye-catching innovations to the packaging market.

- Secure guidance for trays in all sequential stages
- Trouble-free integration in existing production lines
- Interface for external communication
- High sealing power
- Proven SEALPAC InsideCut system
